

## Certificate of Conformity

### **Coreboard and Liner Skjern Paper, Denmark**

The product mentioned above is a packaging paper intended to come into contact with foodstuffs. It was tested at our department on the content and the release of restricted substances listed in different regulations as

- Council of Europe Resolution "Paper and Board intended to come into contact with foodstuffs" (ResAP(2002)1),
- Recommendation XXXVI of the Federal Institute for Risk Assessment (BfR), Berlin, Germany, Issue 01 April 2021
- National (NON-EC) provision on paper and board (food contact material), (143/93), Finland,
- Warenwet, Netherlands,
- Decreto ministeriale 21 marzo 1973, Italy,
- Gebrauchsgegenstände (Gebr.V.) 01.03.1995, Switzerland,
- Guide de bonnes pratiques 15 Avril 1998, France.

Internationally recognized and validated methods of analysis for testing were applied.

Based on the test results it can be stated that coreboard and liner according to the sample material submitted may be used safely for food packaging. It may stand in direct contact with

- dry, non fatty foodstuff,
- foodstuffs, which are peeled or washed before consumption.

In order to reduce the transfer of mineral oil compounds from the packaging material or the ambient air into packaged food it is recommended to check in individual cases if a functional barrier could be reasonable to protect sensitive, dry, powdery food.

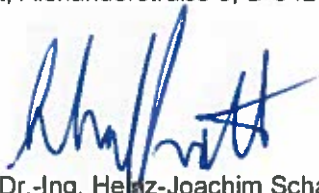

In addition the product meets the demands of the

- Council Directive 94/62/EEC of 31 December, 1994, regarding packagings and packaging waste,
- EU phthalate directive 2005/84/EEC of the European Parliament and the Council and
- EU Standard EN 71 Safety of toys – Part 3 (Issue 2019-08) "Migration of certain elements" and Part 9 (Issue 2009-05): "Organic chemical compounds"

This certificate of conformity is valid from June 16<sup>th</sup>, 2021 on.
